

WHY SAVE oyster shells?

**CHESAPEAKE BAY
FOUNDATION**

Saving a National Treasure

Project led by
Colin Grantz
with support from
**Boy Scouts of America
Troop 1607** and the
**Kiwanis Club
of Williamsburg.**

**There is a critical shortage of
oyster shells for reef restoration
in the Chesapeake Bay.**

When oysters are harvested, some of the habitat for future generations is lost. To help mitigate this shortage, citizens and businesses are encouraged to recycle the oyster shell that is removed. Replacing shells replaces this habitat and helps our oyster populations grow and thrive. To learn more please visit cbf.org/shellrecycling.

**Increasing habitat in the Bay
starts here!**
